DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunishi (US 6,039,590).

Kunishi discloses a connector comprising:

a first connector portion (2);

a second connector portion (1);

a resilient members (17a, 17b);

a plurality of electrical metal plate connection pins (11a, 11b) arranged in rows and column (see Figures 1-2), each pin have a middle portion (17a, 17b) and respective terminals (19a, 13a, 19b, 13b);

a housing side member (30A);

a guide groove (8) defining a guide axis to receive a guide protrusion (7).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2833

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-7 and 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kunishi (US 6,039,590).

Regarding claims 6-7, Kunishi substantially disclosed the claimed invention except for a specific pitch dimension between terminals.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the a specific pitch dimension between the terminals, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Regarding claims 11-12, Kunishi substantially disclosed the claimed invention except for the electric unit is being as a hard disk.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitation. *Ex Parte Masham*, 2 USPQ2d 1647 (1987).
